Condition Report

1483. The cover has been broken in half across its diameter with at least one other break - it has been professionally restored with repainting along the break lines, it is visible to the underside primarily due to the colour difference and absence of crazing. The pot is crazed with some staining to the interior. There are two areas of restoration visible to the interior each approx 5cm long by 4cm deep from the rim down, and a similar much smaller area. Small haircrack to rim edge.
