## Condition Report

487. Total weight 3.9g. The diamonds would benefit from a professional clean, but they have a nice brightness and sparkle, small black inclusions are visible with a x10 loupe. The emerald is 7mm square by approx 3mm deep. The square shape of the table displays many black inclusions visible with the naked eye but it is of a good bright colour. Once faceted corner has a small chip and possible internal flaw beneath this - the former visible with the naked eye.
