

Firearms and Edged Weapons / Wednesday, 8th August 2018 / Lot 773

LOT 773

A scarce 1873 pattern U.S. trowel socket bayonet with broad double edged blade, length 25.5cm, with central spine and blued socket, struck 'PAT. APR. 16472', in its brass mounted black leather sheath with integral frog with brass U.S. stud.

Estimate: £100 - £150

Condition Report

773. Rust to the surface of the bayonet along the length of the spine and some other minor surface oxidization. Some surface cracking to the sheath and typical surface wear, also some greening to the brassware. The rotating socket seems to function very well and it fits into the sheath very well too.
