

Clocks and Barometers / Thu, 1st November 2018 / Lot 1200

### LOT 1200

An early 19th century and later marine chronometer, the two-day chain fusee movement with Earnshaw type spring detent and bimetallic balance, the backplate engraved 'Parkinson & Frodsham Change Alley, London', the silvered circular dial with Roman hour numerals, subsidiary state of wind and seconds dials, inscribed 'Parkinson & Frodsham Change Alley, London' and numbered '1236.', housed in a later brass bowl hung in gimbals, within a later brass bound mahogany three-tier box with painted simulated rosewood decoration, total height 21.2cm (restoration).

Estimate: £1,200 - £1,800

---

### Condition Report

1200. This well presented marine chronometer in a new case is in good working order. The only problem that is obvious is that a small part of the maintaining mechanism is missing, this does not appear to effect the day-to-day running of the mechanism - please see the 10th image on our website to view where this missing part should be.
