Donald Watson - Study of Eiders and Study of Mallard Ducks, a near pair of watercolours with gouache, both signed, dated '56 and '55' respectively, 14cm x 25cm and 16cm x 26cm, both within stained wood frames.

### Condition Report

Eiders - slight rippling to paper. Light browning throughout but appears to be on a buff paper too. Probably slightly faded with associated muting of colour, but generally still okay as gouache used.

Mallards - generally in similar condition to the above but with some spotting and foxing too.

Both mounts with some spotting and neither are archival, nor are the backs. Frames are similar but do not match and have splatters of emulsion and minor scuffs and scratches.
