LOT 2050

A 19th century gilt composition pier mirror with a lattice panel frieze, flanked by foliate topped cluster column pilasters, 95cm x 55cm.

Estimate: £150 - £200

Condition Report

2050. The frieze panel is probably a later replacement but has been done well with a gilded and dark brown painted lattice panel, probably would have been glass. Some minor flakes and chips off gilding and down patches of distressing to plate.
