## Condition Report

634. The central oval panel is probably in association with the bar brooch fitting. There is some chipping to the yellow enamel of the pansy and chipping to the blue enamel of the pansy at 3 o' clock. Otherwise some surface wear can be seen to the two larger blue enamelled panels at the top. The pin is slightly bent by the hinge and is starting to develop a hair crack at the end. Weight 5.7g.
