LOT 2104

A mid-Victorian maple framed bedroom chair of royal interest, the seat rail bearing paper label inscribed 'Buckingham Palace L.C.D' and with 'GR' cypher, the upholstered seat and back raised on turned and fluted legs, height 85cm, width 46cm.

Estimate: £30 - £50

Condition Report

Please note the chair has some minor and historic woodworm to the seat rails, and also the slight loss of the carved section to the top crest of the back. Otherwise the frame is quite solid and still retains what is probably its original horsehair stuffing under the slightly tatty upholstery.
