LOT 1201

An early 20th century oxidized brass surveyor's level by Troughton & Simms of London, the telescope with rack and pinion focusing, lens cap and bubble levels, unextended length 38cm, with tripod fitting, within a mahogany case with leather cover, together with tripod, surveyor's staff and Gunter's chain.

Estimate: £60 - £100

Condition Report

1201. This level is complete with original stand and box. It is in fairly good condition consistent with its age. The leather cover to the box is complete, but buckles are detached and the felt lining is moth damaged. There are, in fact, two surveyor's staffs with this Lot, one contemporary to the level and a more modern example. The original staff is damaged and has been amateurly restored and re-scaled. The Gunter's chain is in a rusty condition.
