### Condition Report

1444. Stand - typical fine crazing to glaze and some water staining to interior which would clean off. Professional restoration to two corners and one small section of rim - very well executed. Indistinct short vertical hairline to rim.

Jardiniere - difficult to determine extent of restoration as it has been so well executed. However, at least two feet, one top corner and part of the same side, plus a small section of rim on another side, have all been restored. In addition a fine vertical haircrack is visible.
