Condition Report

2129. The top tier has two very small chips to the edges of the leaf scrolls, otherwise in fair condition. The middle tier has badly re-veneered corners where the uprights would have fitted, also have loss to the base of two of the upright supports. Some minor glued repairs to joints. The base section is similarly veneered to each corner of the top. There are a few very small repairs to the ground veneer around the frieze and some minor surface scratches.
