LOT 625

A white gold and diamond cluster ring, mounted with variously cut diamonds in a canted corner rectangular design between graduated diamond set seven stone shoulders, detailed '750', ring size approx N, with a case.

Estimate: £2,000 - £3,000

Condition Report

625. Relatively modern, so condition is essentially as new with only typical very light surface scratches. Has not been graded but the stones are fairly clear bright, white stones with only minor inclusions. Approximate total carat weight between 1.1ct and 1.3ct, giving an impression of a 2ct plus stone. Owing to the design, the cluster gives the appearance of a far greater carat weight than it actually is. The cluster consists of a centre stone with a surround of eight further diamonds. All of these are set absolutely flat which gives the impression of a single stone, but without the depth you would have if it were.
