

Cameras and Scientific Instruments / Thu, 12th September 2019 / Lot 1182

### LOT 1182

A late 19th/early 20th century gilt brass cased pocket barometer, the silvered dial with mercury thermometer and revolving scale, diameter 5.2cm, with original leather case (lacking suspension loop).

Estimate: £40 - £60

---

### Condition Report

1182. Generally ok condition. Typical wear and discolouring to silvered scale with some loss to black detail and some wear down to the brass. Dial is fairly clean with some light dirt specks overall, would benefit from a clean. Compass is working and all hinged components work as they should. Leather case is typically worn and scuffed with lifting and ripples in places.
