LOT 2017

An early 18th century oak dresser base, fitted with four drawers with geometric mouldings, on turned legs, height 83cm, width 171cm, depth 51cm (alterations).

Estimate: £100 - £150

Condition Report

2017. The top is quite pale, heavily marked and with splits and evidence of historic woodworm. Some slight cracks to the fronts of the drawers but all mouldings present. Appears that the moulding which runs under the drawers has been replaced at some stage, as has a strip of wood on the rear edge of the top. Generally a little scruffy with overall minor faults typical of its age.
