

Jewellery / Wed, 9th October 2019 / Lot 577

LOT 577

A Georgian gold and cornelian ring, with a shield shaped rotating cornelian, between loop pierced shoulders, ring size approx L1/2.

Estimate: £50 - £80

Condition Report

577. The shield has three long shallow chips along the edges where the stone is supported by the bar. The ring is potentially missing its secure fitting to one side of the shield. The ring has been resized and poorly soldered together which is evident on the shank. The ring is unmarked, however the colour does suggest higher than 9ct.
