## Condition Report

578. The stones have not been professionally graded. The claws are in need of professional attention, one holding the sapphire has been bent out of shape and is no longer supporting the stone. Similarly a number of claws have worn down leaving the stones vulnerable to falling out. There appears to be a clear substance on one diamond and on the edge of the sapphire, potentially glue holding the stones in place. The sapphire has natural inclusions visible under magnification. One diamond has a few surface nicks. Weight 2.6g. Sapphire width approx 6mm, diamond width approx 4mm.
