

Clocks and Barometers / Thu, 7th November 2019 / Lot 1254

## LOT 1254

A late 19th century brass skeleton clock with single fusee movement striking on a bell, the silvered skeletonized chapter ring with black Roman numerals, the pierced frame with bell surmount, on an ebonized base with glass dome, total height 38.5cm, with pendulum and winder key.

Estimate: £200 - £300

---

## Condition Report

1254. Mechanism in working order and passing strike working correctly. Hammer spring somewhat misshapen and requires attention. Correct size and period base and dome but not original to the clock, base recently repainted. Glass dome with very tiny nibbles to the lower edge. Chapter ring requires re-silvering and hour hand insecure. No maker's name.
