Condition Report

2238. One area of lifting of veneer to the top, as well as some minor surface scratches. Some loss and wear to the edges and corners of the triform base with one area of veneer slightly loose. A few small areas of re-veneering to the corners of the base and some general surface wear to carved feet. Some slight gapping to the join in the circular mount below the carved cusp. The finish on the top is quite a high polish but appears to be original.
