

Jewellery / Tuesday, 14th July 2020 / Lot 540

LOT 540

A pair of diamond cluster earstuds, each claw set with the principal cushion shaped diamond within a surround of nine smaller cushion shaped diamonds, with post and butterfly fittings, cluster diameter 0.8cm, cased.

Estimate: £200 - £300

Condition Report

540. An attractive pair of pretty earstuds, both in generally good condition with no significant damage or repairs. Each centre stone approx 0.35ct, each surround total approx 0.30ct-0.35ct, therefore each earstud approx 0.65ct-0.70ct. The earstuds are not marked, but we would suggest the age is mid-20th century. The butterfly fittings are marked 9ct, the settings and posts are not marked, but we think they are likely to be the same and not any higher grade.
