### LOT 533

A gold, platinum, sapphire and diamond oval cluster ring, mounted with the oval cut sapphire within a surround of circular cut diamonds between diamond single stone shoulders, detailed '18 ct. Pt', weight 2.2g, ring size approx R.

Estimate: £80 - £120

### Condition Report

533. The sapphire is an attractive mid to light blue, with good colour saturation. There is a little bit of wear to the edges of the table facet, particularly at one point. It is possible that subsequent to cleaning variation of colour saturation and inclusions within the sapphire would become more apparent. The diamonds have varying sized table facets with one or two surface reaching inclusions, in particular to one of the shoulder diamonds. One of the diamonds to the oval cluster has been replaced with a colourless gem, this gem is near to one of the diamond set shoulders. There are slight signs of overall wear, would benefit from professional cleaning. Suggested age, 1940s. Size of top of ring 8mm x 7mm, excluding shoulders. Diamond weight approx 0.02-0.03ct each stone.
