

Silver and Plate / Tuesday, 16th March 2021 / Lot 371

LOT 371

A plated cylindrical champagne bucket/cooler, engraved 'Louis Roederer fondé en 1776', height 24cm, together with a plated two wine bottle stand with central cooler and cover, height 23.5cm.

Estimate: £40 - £60

Condition Report

Roederer Bucket - no significant damage or repairs but large areas with loss of plating resulting in 'brassy' colour mainly to the monogram and name on each side, but also less so to the rim and high points, e.g., the handles. No great age.

Two bottle stand - no great age. The stand is poorly constructed with very noticeable solder joins to each seam but noticeably around the central ice reservoir where it is joined to the bottle stands, these are not repairs but simply poor quality construction. The base also does not sit flat, again a construction issue. There are areas with loss of plating, noticeably to the inscription on each side, the top of the stand and the high points.
