LOT 502

A faceted citrine and amethyst seal, circa 1830, the amethyst intaglio engraved with a shield, fitted with a faceted citrine handle, height 4.3cm.

Estimate: £100 - £150

Condition Report

502. The intaglio is probably colour foil backed to enhance depth of colour. It is in good condition. The citrine handle has probably been refitted in the past, signs of work to the top of the socket holding the citrine. The decoration to the mount is in good condition. Two small holes to the top of the mount, probably part of the construction to hold the handle in position.
