## Condition Report

2001. The chest has the usual overall surface scuffs, scrapes and marks commensurate with its use and age. There are two surface repairs to the lower edges of the sides of the upper section. The side handles are two different pairs that are applied incorrectly to the base and top sections. There are a few small repairs to the drawer fronts and the leather writing surface is a later replacement. The top left brass handle has been re-attached at slightly the wrong angle. There is also a small burn mark to the front edge above the top drawer.
