

Firearms and Edged Weapons / Thursday, 24th June 2021 / Lot 2458

LOT 2458

A Remington New Model 1858 Patent .44 revolver with octagonal barrel, numbered '13785', barrel length 16.5cm, and walnut grips (some restoration and cleaning).

Estimate: £500 - £800

Condition Report

2458. jHalf cock, full cock and drum revolving fine. The drum is firm and can be removed cleanly. There appears to be some restoration, certainly having new nipples. Also the patina of the ramrod mechanism does not seem right and looks as though that section is also a replacement. There is some overall surface pitting to metalwork.
