### LOT 740

An 18ct gold, yellow sapphire and diamond marquise shaped cluster ring, claw set with the yellow sapphire within a surround of circular cut diamonds, London 1985, weight 7.2g, ring size approx P1/2, with a case.

Estimate: £800 - £1,200

---

### Condition Report

740. The sapphire in our opinion is a natural rather than synthetic stone. It is possible that it has been treated to enhance colour and clarity. There is a crack at the bottom of one shoulder where the shank meets the head of the ring, possibly as a result of stretching when sizing the ring. The surrounding diamonds appear to show slight variation of colour alternating with whiter diamonds, but look to be generally clear stones. Two claws near one shoulder are cracked at the bottom ends.
