LOT 609

A gold and diamond five stone ring, mounted with a row of cushion cut diamonds, detailed '18ct', weight 2.4g, ring size approx O.

Estimate: £150 - £200

Condition Report

609. Unable to provide professional grading for diamonds.

Diamond at one end has a flat chip just below the table facet. At the opposite end the diamond second in has a small chip to the girdle and under magnification you can see it is fractured slightly within the stone on this side.

Under magnification the diamonds have one or two internal inclusions, but appear to be bright white stones. Some wear to claws, a few need re-tipping. Some minor wear to side of the mount where the ring has been worn against other rings. Some thinning to back of shank.
