LOT 577

A gold, platinum, sapphire and diamond oval cluster ring, detailed '18ct Plat', weight 3.6g, ring size approx Q1/2, a 9ct gold, sapphire and colourless gem set ring in a slanting design, weight 2.7g, ring size approx R1/2, and a gold and reconstituted amber ring, detailed '585', weight 2.6g, ring size approx R1/2.

Estimate: £120 - £180

Condition Report

577. Sapphire/diamond cluster - the sapphire is of dark colour saturation, under magnification it has a few internal inclusions. The table facet has a scratch running vertically with a number of nicks to the facet edges. The shank is slightly distorted with a few dents.

Amber ring - the surface of the amber is scratched and worn impacting on its lustre. There is a chip to the underside edge of the amber. Some thinning to the shank.

Sapphire/colourless gem ring - the sapphires are of pale colour saturation and have a few internal inclusions. Minor wear otherwise overall.
