LOT 700

A Victorian gold mounted citrine triple sided rotating fob seal, engraved with mottos and emblems, fitted with a suspension ring, unmarked, weight 13.3g, height 3.8cm.

Estimate: £100 - £150

Condition Report

700. Citrine has some heavy wear to the facet edges and light surface scratching to each side. Some wear to edge of seal design. Rotating hinges are still tight and in working order. The probably later suspension loop is dented and worn/thinned. Some minor loss of definition to the engraved decoration of the surmount and sides.

One of the three engravings is slightly more worn than the other, the top words are slightly difficult to make out. This is the side with the devil looking creature with wings. Much of the lettering is impacted with dirt and may be more readable after a clean.
