### Condition Report

517. The hinged door of the locket is very loose and the pin is slightly protruding at the top. The exterior gilding is a bit faded, particular to the back of the locket, which appears to have a lightly brushed finish. Some variation of colour to the turquoise. The loop attached to the main locket is a little bent and has possibly had a lead solder repair in the past. One circular cut garnet is a bit pushed down in its setting.
