

Jewellery / Wed, 6th October 2021 / Lot 697

## LOT 697

A 9ct gold ring, mounted with three oval cabochon dark opals with two pairs of circular cut diamonds at intervals, weight 3.3g, ring size approx P.

Estimate: £70 - £100

---

## Condition Report

697. The ring is in generally good condition with no significant damage or repairs. The opals have a nice play to the colours. The diamonds are bright, white and sparkly. The mount is in good order with only typical light surface scratches and wear, and a small nick/knock to shank. The only real issue is some glue residue visible under magnification to the side of one outer opal where it has presumably been re-secured in its mount. This is not obviously noticeable, but becomes apparent under close inspection. The inside of the shank is marked 'S&Co' and '375' beside each other and stamped '9k' on other side of the shank.
