LOT 503

A diamond set marquise shaped cluster ring, claw set with the principal curved rectangular mixed cut diamond at the centre, otherwise set with smaller cushion cut diamonds between diamond two stone shoulders, unmarked, ring size approx J, with a case.

Estimate: £250 - £350

Condition Report

503. One or two edge chips to the principal diamond. Fracture chip by one corner claw to the top part of the diamond. The diamond has one or two gletz inclusions. One claw is out of alignment at one corner where the fracture chip is. The remaining diamonds, in a variety of differing cuts, some have a few pique and gletz inclusions. Shank of ring has an applied sprung section to the interior of the back. There is a possibility that the head of the ring was originally yellow gold and subsequently platinum plated.
