Condition Report

630. Diamonds appear to be fairly clear stones and bright, white and sparkling, no obvious damage. Principal sapphire and one end sapphire have abraded facet edges, particularly to the table and girdle, both appear to be fairly clear stones. The sapphire at the other end has a variation in cut and is darker in colour saturation, with a few nibbles to the girdle and minor abrasions. This sapphire has a few internal inclusions. It is possibly a replacement stone.

Claws have been re-tipped in the past. Some minor thinning to the shank.
