Condition Report

Ruby ring:

Rubies are of medium colour saturation. One side ruby has moved in its setting and is extremely loose. This will need to be secured in place professionally before the ring is worn.

Generally very minor abrasion to table facet edges of the rubies.

Diamonds have one or two inclusions. Fairly white stones. Minor thinning to the shank.

Diamond ring:

Diamonds generally are included stones. One with surface reaching inclusions breaking through onto the table facet.

Minor thinning to the back of the shank.

Both rings with typical light surface scratching. Both would benefit from a clean.
