LOT 670

A pair of gold and garnet rectangular cufflinks, each mounted with a rectangular step cut garnet within decorated borders, unmarked, weight 9.8g, dimensions of each front 1.5cm x 1cm.

Estimate: £50 - £80

Condition Report

Cufflink one - Both garnets have noticeable chips. One garnet has a substantial chip reaching across approx. one third of the stone.

The other garnet is chipped to one end on either corner, reaching under the setting. The collet setting is bent inwards, probably as a result of the impact which damaged the stone.

Cufflink two - One garnet has a small chip to the table facet edge.

All garnets have a few minor surface scratches or nicks to facet edges.

The garnets generally have only one or two inclusions but are largely clear internally. The cufflinks are quite dirty currently and would benefit from a clean.
