

Jewellery / Wednesday, 13th April 2022 / Lot 607

LOT 607

A gold, sapphire and diamond cluster ring, mounted with two cushion cut sapphires, otherwise set with cushion and rose cut diamonds, detailed '18ct', weight 3.6g, ring size approx M.

Estimate: £180 - £240

Condition Report

Both sapphires have abrasions to some facet edges. Slight windowing to the centres of both stones.

Three or four of the diamonds are chipped, only really noticeable under 10x magnification.

One or two diamonds are almost only diamond shards rather than any recognisable cut.

The largest diamond has one or two inclusions, but generally the stones appear to be fairly clear internally.

They slightly draw colour.

'18ct' mark in fairly rubbed.

Some slight wear/thinning to the shank.

Would benefit from a clean
