### LOT 617

A gold ring, claw set with an oval cut garnet between foliate shoulders, detailed '9ct', weight 3.8g, ring size approx M1/2.

Estimate: £60 - £100

---

### Condition Report

The garnet has a small scratch on the edge of the table facet running onto a star facet. One or two tiny nicks to the table facet edge.

Some abrasion to pavilion facet edges only noticeable when looking through the stone under 10x magnification. Garnet appears to be a fairly clear stone internally.

One claw tip lacking, some other claws are beginning to show signs of wear.

Generally the ring is in good overall condition.

Garnet size approx. 14mm x 9.5mm
