LOT 655

A Victorian gold backed, silver set and diamond pendant brooch, mounted with cushion and rose cut diamonds with the principal diamond mounted at the centre, fitted with a detachable rose cut diamond suspension, unmarked, weight 19.3g, length 5.3cm, with a case.

Estimate: £1,000 - £1,500

Condition Report

The principal diamond looks to be a fairly clear stone but has a small cutting imperfection to one side. The other diamonds generally have a few inclusions. The piece would benefit from careful professional cleaning. Evidence of lead solder visible at the centre of the back and also lead solder supporting the contact points of the construction at the back. The diamond suspension loop is probably in association.
