Condition Report

The ring is unmarked, we have tested the ring for gold and it is testing as higher than 9ct.

The centre sapphire has a small chip to the girdle/crown on one side, only really noticeable under x10 magnification.

Generally the sapphires are of pale to medium colour saturation, nicely matched for colour.

Diamonds are bright white stones, with one or two inclusions noticeable under x10 magnification.

Resized in the past. Thinning obvious to the back of the shank on one side. Slightly misshaped as a result.

Measurements approximate and limited by setting:

Central sapphire - 4mm x 6mm

Side sapphire - 2.5mm x 3.5mm

Side sapphire - 3mm x 3.5mm
