

Jewellery / Wednesday, 8th June 2022 / Lot 519

LOT 519

A gold, platinum and diamond seven stone cluster ring, mounted with the principal circular cut diamond within a surround of six further circular cut diamonds, detailed '18ct & Pt', weight 2.6g, ring size approx M1/2.

Estimate: £100 - £150

Condition Report

The ring is currently rather dirty. Face-up the diamonds appear to slightly draw colour to yellow. Under x10 magnification they appear to have one or two tiny inclusions. Typical light wear to the shank/setting. The setting limits the ability to size the diamonds accurately: centre stone approx. 2mm diameter, surrounding stones approx. 1.5mm diameter each.
