LOT 527

A gold, platinum and diamond five stone ring, collet set with a row of cushion cut diamonds graduating in size to the centre stone, detailed '18ct Plat', weight 2.4g, ring size approx N1/2, with a case.

Estimate: £180 - £220

Condition Report

In general the diamonds appear to be fairly white stones. Stones secure in setting.
Under x10 magnification the diamonds have one or two inclusions under the table.
Slight wear to the sides of the setting. A deep scratch to the interior of the shank, this probably happened during manufacture.
Typical light scratching to shank.
The ring would benefit from a clean.

Stone measurements are approximates and limited by the setting:

centre stone - approx 3.5mm x 3.5mm

side stones - approx. 2.5mm x 2.5mm

outer stones - approx. 1.5mm x 1.5mm
