LOT 702

A 9ct gold and oval black onyx signet ring, Birmingham 1971, weight 6.4g, ring size approx R, and a gold and green gem set ring with ridged shoulders, unmarked, weight 7.1g, ring size approx T1/2.

Estimate: £150 - £250

Condition Report

Black onyx ring - the black onyx has one or two surface scuffs particularly by the edges. There are one or two edge nicks to the onyx. There is slight loss of definition to the design of the gold shoulders as a result of buffing. Hallmark clear.

Green gem ring - some surface wear to the gem, including nicks and scratches, these could be buffed out but with some loss of definition. We cannot be 100% certain but would suggest the green gem could be azurite. The ring tests as 9ct gold.
