

Jewellery / Wednesday, 6th July 2022 / Lot 771

LOT 771

A gold, opal and pink sapphire harem ring, detailed '18K', with an interchangeable varicoloured gemstone set central section, weight 6.9g, ring size approx M1/2, with a case.

Estimate: £200 - £300

Condition Report

The current changeable section of the ring is held in by a threaded post and nut, we have not been able to unscrew this to confirm that the other gemstone set section will fit.

One of the opals is badly chipped, the opal to the left of this has a brown surface inclusion.

The cabochon amethyst has numerous surface reaching inclusions, so too does the grey/blue stone.

Please note that though the ring is marked '18K', we have subsequently tested it and it is not 18ct gold. There is minimal gold content, likely less than 9ct.
