### Condition Report

There are four lead solder points at the back of the brooch holding the collet set citrine into position.

Small dent at the back of the hinge pin.

The drop loop is marked '375', this would be a replacement loop.

Also there is an old repair to the back.

There are one or two dents particularly to the edge of the top of the brooch.

The citrines are of medium to pale colour saturation.

There is some loss of definition to the engraved decoration to the front of the brooch.
