## Condition Report

The sapphire has some abrasion to facet edges and an abraded scratch to the table. It has a window below the table, with some obvious colour zoning evident under x10 magnification. There is a small chip to the girdle/bezel facet on one side.

The diamonds look to be fairly white bright stones but have obvious inclusions under x10 magnification, a few are visible without magnification.

General light scratching to the setting/shank, very minor thinning to the back of the shank.

Sapphire 4.3mm x 4.00mm x 2.5mm. Diamonds possibly .15ct each. Measurements approximate and limited by setting.
