LOT 620

A Georgian gold and silver set, sapphire and diamond cluster ring, mounted with the oval cut sapphire within an openwork surround of rose cut diamonds between foliate decorated sides, unmarked, weight 3.8g, ring size approx M, with a case.

Estimate: £1,500 - £2,000

Condition Report

The foliate motif to one shoulder is secured in position by two pins but this is quite loose. This is not the case on the other shoulder.

The sapphire has got some surface scratching. The rose cut diamonds seem to be in fairly good condition.
