LOT 1296

A Chinese brown patinated bronze figure of a mythical beast, Qing dynasty, modelled standing on a pierced circular base, height 19.5cm.

Estimate: £80 - £120

Condition Report

1296. The figure is in generally good condition with no significant damage or repairs. Typical surface wear and a bit dusty and dirty. There is obviously something missing which would have attached to the cylindrical sleeve held beside its right hand, which may have been a censer or taperstick component (?).
