### Condition Report

One large turquoise is slightly loose, it has a chip to the girdle.

Some overall discolouration to the turquoise, two of the larger stones and a number of the smaller stones are a shade of green.

One or two turquoise do have some surface reaching inclusions/cracking in the odd location, mostly to the smaller stones.

A few dents to the beaded decoration.

The connecting ring on the pendant which joins to the neckchain is fairly heavily worn and thinned - it would be advisable to replace this.

The chain overall is in generally good condition. The ring connecting the main chain to the hallmarked oval link is broken and is heavily worn - it would be advisable to replace this.
