## LOT 601

An 18ct gold and varicoloured diamond ring of bombé form, the front mounted with a serpentine row of varicoloured diamonds, weight 8.3g, ring size approx P1/2.

Estimate: £250 - £350

---

## Condition Report

The coloured diamonds are probably natural but treated stones, treated to produce the blue and purple colouring. The black diamonds too may well have been treated.

However, the ring has not been sent to a laboratory so we cannot say for certain that they are not synthetic stones.

Minimal wear/scratching overall.
