Condition Report

Stand - small chip to footrim, lots of glaze nibbles to circumference which is also stained along its entirety, small losses to applied foliate terminals of handles. Typical surface scratches.

Tureen - one shell handle has been reattached and has two drilled holes to it where it looks as though a replacement handle may have been used at some point. Both shell handles have a small chip to their edge. A few small chips to the inner flange where the cover sits. Typical scratches to the interior.

Cover - minuscule nicks to knob, otherwise in good condition overall.
