## Condition Report

246. Thrips have invaded the frame and are concentrated on the mount, mainly upper right, none appear to have made it on to the picture support. Around the edges of the picture support is an area approx 2mm of 'mount burn' discolouration. There is minor age toning elsewhere, but overall the picture is clean with good definition and strong pigment.

Provenance - inherited from a relative of the vendor many years ago, but vendor does not know anything further.
